

You are invited to compete in the Spring 2022 Lunar Habitat and Technology Design Competition!

**NEW WORLDS
AWAIT YOU**

*Design a 3D model of a
habitat in a lunar lava tube!*

Who: Teams of 4-6 middle school aged students (grades 6-8) from formal and informal educational organizations.

What: The competition challenges students to design and build a 3D model of a habitat located in a lunar lava tube. A technology-focused project is also available for teams who want to create new technologies for lunar exploration.

Where: Team deliverables are submitted and judged online (end of April) with the finals held in an online conference setting (early May).

Why: Students will dive into a space exploration project-based activity centered on real science and engineering! Free curriculum and resources! Connect with STEM professionals! Win prizes!

**The competition began Feb. 14 – but
there is still time to join the FUN!
Register by Feb. 19, 2022**

Are you ready to compete and have fun?
